Introduction – Liquid Medical Oxygen (LMO):

Virtually every hospital needs oxygen and the most economical way to hold large quantity is in a liquid form. Oxygen liquefies at –183 deg.C and to keep it this cold a specific type of container is needed. This special vessel is called a Vacuum Insulated Evaporator or VIE.

There are additional advantages to keeping oxygen in liquid form, as well as the cost considerations. It requires minimal maintenance and is easy to access and use. In most hospitals, all you see of the system is the tap in the wall next to a bed. The VIE tanks are located outside the hospital buildings and SHAKTISHREE AIR PRIVATE LIMITED ensures they are regularly re-supplied with oxygen.

Oxygen is drawn off as needed, passed through a vaporizer and turned into gas. A control station regulates the flow of the gas from the VIE before it enters the hospital network pipework. This is an essential safety feature, and an area where SHAKTISHREE AIR PRIVATE LIMITED expertise and experience is second to none.

Advantages of Liquid Medical Oxygen:

- Holds large volume.
- Security of supply: Ensures security of supply by providing approximately5 day's stock as against 1 day from Shaktishree Air private Limited.
- Minimizes Shaktishree Air private Limited r handling: With very less Shaktishree Air private Limited r to move, noise pollution becomes almost nil. Because SHAKTISHREE AIR PRIVATE LIMITED manages the vessel and supply for you, manning and labor costs are reduced.
- Simple to operate: No manning is required. The Liquefied Medical Oxygen installation is a low-pressure facility which is safer than handling high pressure Shaktishree Air private Limited
- Provides flexibility: It can absorb fluctuating hospital demands.
- Minimizes administrative cost
- Frees up space presently occupied by large quantity of bulk Shaktishree Air private Limited
- Totally eliminates the hazards associated with storage and physical movement of bulk Shaktishree Air private Limited

Range Vessels available depending upon the consumption pattern. VIE 6kl-50Kl

- Vacuum insulated vessels which ensures that the losses are minimal.
- Required vessel capacity as per Design. The unique feature of SHAKTISHREE AIR PRIVATE LIMITED is the **National Scheduling Center (NSC)** to suit the needs of each customer. Vessel size is determined based on the demand pattern, demand fluctuation, maximum draw-off rates, duration and distance from the Liquid Medical Oxygen production center.
- Robust logistics to ensure supply. Liquid Medical Oxygen supplies continue even though there are civil disturbances or transport strikes.
- Product quality better than the IP specified purity. Every batch monitored by Drug Inspectorate approved specialists.

- Our Liquid Medical Oxygen installations are equipped with set off alarms and sensors to monitor Vessel pressure and volumes

- Customer training is given by our engineers on the alarm systems, re-ordering and emergency procedures. Our Installation Engineering Team provides round the clock maintenance services at customer premises.

- Above all "TOTALLY SAFE", as all specifications of the SMPV Rules, 1981 of the Dept. of Explosives, Govt. of India, both national and international are complied with.

Technical & Safety Features:

Our impeccable record for safety is a by adopting the global safety standards over and above the Indian statutory guidelines.

SHAKTISHREE AIR PRIVATE LIMITED Group's global safety standards, we will incorporate all such high-level safety standards in the Liquid medical oxygen storage system in your hospital for further enhancement of safe practices in handling of medical oxygen supply. The features and benefits of such initiative is explained below: -

Mandatory alarm signals:

- Primary vessel contents are low
- Primary vessel pressure is low (Back up supply is in operation).
- Hospital pipeline pressure is low

Equipment requirements:

- Dual parallel regulators in customer pipeline & open/online. No by-pass systems to pressure regulators.
- Regulators to be in the set position.
- Three way valves on alarm switches.
- Thermal type relief valve must not be fitted as pipeline pressure relief valve, must be a certified performance Safety valve

Proposed Scheme

It is proposed to install a Vacuum Insulated Storage Vessel in close proximity of the manifold. Liquid Medical Oxygen shall be carried from our stock at local office, duly tested as per IP standards, and will be decanted into the vessel from time to time. A stock-out level will be defined, which shall be monitored by customer supervisor. According to the status of the stock-out point, delivery logistics will be calculated by SHAKTISHREE AIR PRIVATE LIMITED to ensure that the storage will never reach the stock-out point.

Scope of Works to be done

	Work	Shaktishree	Customer
1	Design, Eng., Testing & Installation of		
	- Liquid Medical Oxygen VIE	☐	
	- AV Coil	☐	
2	Foundation and structural work for installing **Storage vessel and vaporizer coils as per SHAKTISHREE AIR PRIVATE LIMITED specifications.**		☐
3	Painting of vessel and manifolds as per SHAKTISHREE AIR PRIVATE LIMITED I Specifications.	☐	
4	Maintenance of vessel and AV Coil within Battery limits.	☐	
5	6 Supply		
1	Liquid Medical Oxygen	☐	
7	8 Commissioning and Supervision		
1	Commissioning and supervision of entire system within defined battery limit.	☐	
2	Training and assistance for 2 days.	☐	

Your scope of work

- Open, clear space of 9M X17 M as per requirement off CCOE (PESO) for installation of LMO vessel and AV Coil, with clear space for tanker approach.
- Secured area for unloading and storage of LMO vessel and AV Coil during the installation phase.
- Necessary work permits / entry gate passes required by SHAKTISHREE AIR PRIVATE LIMITED I / SHAKTISHREE AIR PRIVATE LIMITED I sub-contractors for installation of the vessel.
- Application to Chief Controller of Explosives, Vadodara along with license fee.
- Any other statutory approval if required by Local Body/Govt. agencies.

CCOE [PESO] GUIDELINES

1. 6Ft High fencing of Industrial gauge
2. Hard stand for the VIE
3. Anti-Crash barrier
4. Fire Buckets
5. 2 Fire Extinguishers
6. No moving parts or machinery in the vicinity
7. No underlying cables in the premises
8. No overhanging cables in the vicinity
9. No over-looking windows or balconies
10. No residential accommodations within premises.

Emergency supply options

In all hospitals, the most economical emergency supply system is Shaktishree Air private Limited r based. Ten to Twelve Shaktishree Air private limited or more should be connected in what is known as a manifold to provide emergency oxygen. You must keep stock of adequate number of Shaktishree Air private Limited which will provide gas for 24 hours of usage. When in use, Shaktishree Air private Limited can be easily replaced, making it possible.
Note: The back-up Shaktishree Air private Limited for the manifold with at least 1-day oxygen consumption will be the responsibility of the hospital. The same should be arranged locally for filling and replacement of Shaktishree Air private Limited.
We assure you that we maintain very high standards of quality and service and are confident of meeting your expectations.

COMMERCIAL QUOTATION

Quotation :SAR/01 Date : 16-03-2026

To,
JECCRC Medical College,
Hospital and Research Center,
JAIPUR, RAJISTHAN

Dear Sir/Madam,

Kind Attn.: Dr. Preetam Tamboli

Subject: Quotation for 20 KL LOX tank on rental basis along with gas supply

Reference: With reference to above subject, we thank you very much for your valued inquiry and are pleased to quote our most competitive rate for above subject

Multi Element Description	Liquid Medical Oxygen as per IP –2010
Basic Price	Rs15.18 M3
Delivery Charges	Rs 04.50 per M3
Facility Charges per month for the 13KL/20kl VIE	Rs 32000.00
Excise duty (ED) for liquid medical oxygen	NIL

Taxes & Levies: The above prices are exclusive of any taxes & levies – GST, etc.

As on date: Basic Price attracts GST of 12%. Delivery Charge & Facility Charge attracts GST of 18%. Currently for Medical Oxygen the Excise Duty is NIL At the time of supply if any other taxes/ Excise Duty will be applicable accordingly as per Govt. statutory norms

Other Charge:

One-time Installation Charges (FOR 10KL/11KL/13KL VIE): Rs 4, 50,000.00+18% GST
(Advance Payment) Includes Transportation of VIE / Loading – Unloading of VIE/
Engineering / Testing of VIE / Commissioning
/Octroi(LBT)
License fee for three years for 20KL VIE [PESO]: 2Lac

(Optional)

Automatic Alarm System (O & ED): Rs 3, 00,000
Telemetry: Rs 50,000

Any concealed or overhead structures will be charged depending upon the site conditions.

** Any additional tax like octroi or fee at check post while entry of VIE or
other materials will be to your account.
***Govt. fee and other statutory levies at actual will be paid directly by you

Gas Consumption Pattern

The above pricing is derived based on the current Gas consumption pattern communicated. Medical Oxygen in Bulk: 10000M3 per Month (At present consumption based upon discussion)

Minimum Expected Volume: 10000m3/ month
Minimum volume of 8000 M3 per month must be purchased. The Customer shall pay compensation to SHAKTISHREE AIR PRIVATE LIMITED for the quantity falling short of the minimum agreed volume at the rate of 90% of the price payable at the relevant time. If the Customer's uptake is below 8000 M3 per month for any three months in a year, SHAKTISHREE AIR PRIVATE LIMITED shall have the option to withdraw the Installation.

Payment Terms:

Payment terms will be as follows:

- 100% of one-time installation cost (Rs 3, 00,000 + 18% GST) in advance along with the LOI.

- The facility charge and Liquid Medical Oxygen bills should be cleared within 30 days from the date of invoice. If the payments are not realized in time, SHAKTISHREE AIR PRIVATE LIMITED has the right to stop the supply within One week after giving prior intimation in writing.

- Shaktishree air private limited will be responsible for all activities related to procurement of License from PESO.

Price Escalation

The current pricing is based on current Power, Diesel & Inflation rate.
Please note that for gases business the two most important factors impacting our cost is power price and diesel price. In the last five years on an average, the price of power has increased by almost 29% and the price of diesel has increased by around 12%.

Escalation factor: Power escalation: 1:1
Diesel escalation: 1:0.10

Long Term Agreement (LTA)

The minimum period of supply will be 7 years and a mutually signed agreement will be in place covering the above commercial terms, supply of product, ownership of equipment's, pay and responsibility of operation. This is mandatory before the commissioning of the equipment.

Validity of the Offer

The offer is valid for a period of 30 days from the date of our offer and thereafter subject to our confirmation in writing.

CIN No. : U20111GJ2023PTC144725

TERMS & CONDITIONS :	
Tank Installation	
1	LEAD TIME FOR DELIVERY: A minimum of 70–75 days is required from the date of receipt of the formal Purchase Order. Major fabrication and erection work (pipelines, fittings as per CCOE norms) will be completed at our workshop for the Storage Tank installation project. Timely delivery is strictly dependent on the completion of all required licensing formalities and information to be provided to us by the customer.
2	TRANSPORTATION CHARGE FOR LIQUID GAS SUPPLY: The basic product rate offered is inclusive of transportation charges for tanker-load delivery of Liquid gas to the customer\'s plant.
3	PRICE ESCALATION / YEARLY PRICE REVISION Price is subject to escalation based on diesel and electricity costs, as follows: Power Escalation For every 1 paisa increase in actual power cost/unit, the product price will increase by 1 paisa/m^3. Diesel Escalation For every 10 paisa increase in diesel rate, the product price will increase by 1 paisa/m^3. Additional Conditions Escalation will be calculated quarterly. Power Base for escalation: Based on the power cost at our plant at the time of installation. Diesel Base for escalation: Frozen at the time of signing the agreement. Escalation will be raised via Debit Note every calendar quarter. If the customer opts not to follow quarterly escalation, a 7% yearly price revision shall apply.
4	MOBILIZATION CHARGES FOR STORAGE TANK & VAPORIZER: Transportation charges for mobilizing the Storage Tank, Vaporizers, and accessories to the customer site will be extra at actuals. The customer must provide appropriate unloading and installation equipment onsite, including suitable crane, hydra and any other required lifting equipment
5	APPROVALS & LICENSING: The customer is responsible for obtaining all required approvals/permissions for installation of the Storage Tank if applicable, particularly from the Jt. Chief Controller of Explosives (PESO), Nagpur. We will provide support and guidance for completing licensing formalities. Optional Consultancy Services We can provide complete consultancy for obtaining PESO approvals for the above mentioned price Licensing fees payable to PESO will be borne directly by the customer via online payment.
6	AGREEMENT PERIOD: Due to capital investment in storage tanks and vaporizers, an Equipment Lease–cum–Liquid Gas Supply Agreement shall be signed for a minimum period of 7 years. Renewal for an additional 5 years will be mutually discussed and agreed upon.
7	SHAKTI INDUSTRIAL GASES – SCOPE OF SUPPLY: Supply of Cryogenic storage tank with suitable Atmospheric Vaporizer. Interconnecting pipelines and accessories within the SMPV area. Pipeline up to Tank Battery Limit (Vaporizer Inlet). Any additional piping from vaporizer outlet to consumption point will be chargeable. Storage tank will include: Two high-capacity, PESO-approved safety relief valves Third-party inspection (TPI) as per CCOE norms
8	CUSTOMER – SCOPE OF SUPPLY: The following shall be provided by the customer: Developed land and required space Electricity for the installation project All civil, structural, and electrical work, including:
