Introduction – Liquid Medical Oxygen (LMO):

Since your hospital need oxygen & the most economical way to procure medical oxygen in large qty. is in liquid form.

Advantages of Liquid Medical Oxygen:

- Holds large volume.
- Security of supply: Ensures security of supply by providing approximately 7 days stock as against 1day from cylinder.
- Minimizes cylinder handling: With very less cylinder to move, noise pollution becomes almost nil.
- Simple to operate: No manning is required. The Liquefied Medical Oxygen installation is a low-pressure facility which is safer than handling high pressure cylinders.
- Provides flexibility :It can absorb fluctuating hospital demands.
- Minimizes administrative cost.
- Frees up space presently occupied by large quantity of bulk cylinders.
- Totally eliminates the hazards associated with storage and physical movement of bulk cylinders.

Proposed Scheme

It is proposed to install a Vacuum Insulated Liquid Storage Vessel in close proximity of the manifold.

Liquid Medical Oxygen shall be carried from our stock at local office, duly tested as per IP standards, and will be decanted into the vessel from time to time. A stock-out level will be defined, which shall be monitored by customer supervisor.
